Investment strategy

The Vivante Maximus Alternative Fund's investment strategy provides investors exposure to the alternative asset classes not generally accessible to the retail investor. Previously this investment class was only available to high-net-worth individuals, life companies, pension funds, corporates, and investment banks. Alternative asset classes are usually classified as non-public companies, non - stock market investments and are therefore classified as high-risk investments as it is not traded on the stock exchange. The fund is diversified across a range of alternative asset classes utilising a multi-manager approach whereby fund managers are combined on their skills and expertise in different alternative asset classes. The available alternative asset classes include bonds, listed and unlisted securities, non-equity securities, money market instruments, preference shares, property securities, hedging instruments, private equity, private credit, real estate, venture capital and infrastructure. The fund managers monitor economic trends carefully and identify market segments where the best opportunity for growth exists. The fund aims to provide returns in excess of the target which is CPI + 7%.

The portfolio typically has high equity exposure which may result in capital volatility over the short to medium term. The portfolio is managed in such a manner that capital losses over one year periods may occur.

The launch date is the start date of the portfolio. Returns are based on the time-weighted returns of the underlying Funds. These returns are after the deduction of the portfolio management fees and either before, or after, the deduction of any platform administration fees (depending on the platform on which the tracker or index portfolio is invested) and before financial adviser fees. Returns for periods exceeding one year are annualised. The return for the Consumer Price Index (CPI) is at the end of the previous month. The underlying funds may contain exposure to assets that are invested globally, which may present additional risks. Individual investor returns may differ as a result of platform and adviser fees, the actual investment date, cash flows and other transactions. All fees exclude VAT. The investor acknowledges the inherent risk associated with the portfolio (currency, investment, market and credit risks) and that capital is not guaranteed.
